

Development Plan Review Assignment

Using the research and notes from the class as well as any outside materials you wish to include, you are to create a development assessment tool and use it to assess the Richmond Center Development in terms of safety and crime vulnerability. The assignment is broken down into two main parts:

Assessment Tool: Create an actual assessment tool covering the main areas of crime prevention that YOU feel are necessary to review when assessing vulnerability to crime. Using the neighborhood assessment document as a GUIDE, create your assessment tool in a manner that will make it easy to use for the actual assessment. In addition, include a brief write up (1-2 pages) discussing why you included the aspects that you did in the creation of your assessment tool.

Richmond Center Development Review: Using your newly created assessment tool, conduct a design review of the Richmond Center to determine what areas (if any) are problematic in terms of crime prevention and opportunities for crime. Specifically, what areas do YOU feel are problematic with the design and may contribute to criminal victimization? In performing your assessment include a brief write up (2-3 pages) discussing your overall assessment of the development as well as ways in which you feel that the design could be improved.

Due Date: April 30, 2010
